Summary

I develop backend systems, RESTful APIs, and cloud-based solutions using C# and .NET. I have hands-on experience with AWS serverless architectures and integrating AI tools into applications. I value clean architecture principles and enjoy turning complex problems into effective software solutions.

Education

Computer Engineering 07/2022 – 10/2026
Düzce University | GPA: 3.24/4.00 Düzce, Türkiye

Work Experience

Backend Developer Intern 07/2026 – 09/2026
EPAM Systems Türkiye Istanbul, Türkiye

- Actively contributed to backend development for large-scale software projects in collaboration with international mentors and engineers.
- Designed and developed production-grade, cloud-based, and scalable microservices using various AWS serverless services.
- Collaborated with multinational teams in an Agile environment, conducting all technical meetings and written communication entirely in English.

Projects

Smart Summary Assistant | ***C#, ASP.NET Core, Web API, AI***
Live Demo

- Developed an AI-powered media summarization tool that transcribes content from local audio and video files or YouTube links and generates summaries tailored to users' needs.

TruthLens | ***C#, ASP.NET Core, Web API, AI***
Live Demo

- Developed a hybrid, AI-powered fake news detection and fact-checking system that analyzes text, links, and images to assess content accuracy and provide credibility evaluations.

Technical Skills

Programming Languages: C#, SQL, Java, Python
Frameworks and Technologies: ASP.NET Core, Entity Framework Core, REST APIs, AWS, Serverless Architecture
Tools and Methodologies: Git, Agile / Scrum

Languages

Turkish: Native
English: C1 Listening, B2 Speaking
